Software Engineer (Full-time) *Jan 2022 - November 2024*
 - Successfully developed functional iOS and Android apps that met all customer requirements.
 - Maintained constant communication with clients to ensure satisfaction with the product.
 - Successfully managed projects from start to finish, ensuring all deadlines were met.
 - Successfully completed 3+ projects as a mobile developer.

PROJECTS

- Hetal - Retail Analytics Platform:** A comprehensive retail analytics and merchandising platform that helps consumer brands optimize their in-store presence. The mobile app enables real-time shelf data collection, compliance tracking, and merchandising optimization. Features include photo-based shelf audits, promotional compliance monitoring, inventory tracking, and ROI analysis for merchandising spend.
Tech: React Native, Firebase, Node.js
Links: Apple App Store, Google Play Store, Hetal Website
- Trueilm App:** An educational app focused on Islamic learning, offering users access to the Quran, Hadith, eBooks, and audiobooks. It also provides a subscription service for premium content.
Features:
 - Read and listen to the Quran and Hadith.
 - Access a wide collection of Islamic eBooks and audiobooks.
 - Order books and manage subscriptions for premium content.**Link:** Apple App Store, Google Play Store
- Paylaterr App:** A "Buy Now, Pay Later" application that enables users to make purchases and pay in flexible installments. It offers seamless integration with various merchants and a user-friendly dashboard to track spending and payments.
Links: Google Play Store, Apple App Store, Paylaterr Website
- Aliflaila – Kids Digital Library:** An engaging kids' digital library app offering interactive stories, audiobooks, and educational content for children. Designed to foster creativity and learning in a fun way.
Links: Google Play Store, Apple App Store
- KrillPay (Mobile Wallet):** Digital payment app supporting money transfers, bill payments, and merchant transactions.
Tech: React Native, Node.js, Firebase
Link: Google Play Store, Apple App Store

- **PowerPoint Add-in - Template Manager:** An enterprise PowerPoint Add-in that streamlines presentation creation by providing users with instant access to pre-designed templates. Users can browse, preview, and apply professional templates directly to their slides with one click, ensuring brand consistency across all presentations.
Tech: Office.js, React, NestJS, PostgreSQL
Features: Template library management, one-click template application, real-time preview, cloud synchronization
- **Classmate (Ehya):** An education app by Ehya that supports virtual/classroom-style tools for students — attendance, assignments, class resources, etc. Helps students stay organized and connected with their coursework.
Link: Google Play Store
Tech: React Native / Kotlin / Swift / Firebase
- **Narnj:** An online e-commerce marketplace app where users sell their products. Users can chat with each other and make offers for their products.
Link: Google Play Store, Narnj Website
- **Be-Connected App:** A doctor booking app designed for both doctors and clinics. Doctors offer their patients the ability to book appointments online. For clinics, it offers doctors to sit around their nearest locations.
- **Earnlingo:** A language-learning app designed to connect people globally, enabling them to practice and learn different languages through text, voice, and video chats with native speakers. Features include real-time messaging, voice notes, and personalized language matching.
Tech: React Native, Firebase, Zustand, Node.js

VOLUNTEER EXPERIENCE

- **Community volunteer at Rizq**
Distributing food and serving meals at various events.

Lahore, Pakistan
Nov 2019 - Jan 2023
